

PUBLIC AWARENESS CREATION OF NATIONAL DATA CENTRES IN AFRICA

Highlight:

- National Data Centres (NDCs) play an important role in providing support to the CTBTO Member States
- NDCs advise CTBTO Member States on verification of the CTBT through the sharing of data and products
- Many elements of monitoring efforts by CTBTO are also used in other contexts
- Data from IMS stations has the potential to be used for civil and scientific applications
- Enhanced awareness creation of the NDCs in Africa has potential to create wide interest in spin-off applications of CTBTO data for civil and scientific purposes
